ABOUT ME

Accomplished software engineer with extensive working experience on various projects that mainly focus on operational productivity. Seek to expand career growth and to secure a challenging position where I can utilize my technical skills while making a significant contribution to a reputable organization, and to contribute a solution to our current global problems.

SKILLS

Full Stack Development:

- Programming Languages : PHP, C#, and .NET, JavaScript
- Data Management : MySQL, MSSQL, Cloud SQL, BigData, MongoDB
- Scripting languages: PowerShell, Bash
- Frameworks: Laravel, CodeIgniter, Yii, MVC 3 4 5, MVC Core, NodeJS, MeteorJS
- Software Implementation : N-tier, Web-Queue-Worker, Microservices, SOAP, Event-driven architecture, Web API, Automation

System Administration:

- Office 365 Administrator: Azure Active Directory, Exchange Server, Compliance and Security, and Sharepoint
- Release/Production Manager in IIS Servers and Linux Apache Servers
- Server Administrator: Linux Apache Servers, Windows IIS Servers, DB Servers
- Cloud Services: Azure, GCP, Kubernetes Engine, Compute Engine, Cloud Functions, App Engine

Project Management:

- Project Management Body of Knowledge (PMBOK)
- Software Development Life Cycle Waterfall(SDLC)
- Scrum Methodology
- Capability Maturity Model Integration(CMMI)
- Information Technology Infrastructure Library (ITIL v3)

Business Analysis:

- Identify, understand and plan organizational/customer impacts of the planned systems, and ensure that new technical requirements are properly integrated with existing processes of the systems or business procedures.
- Plan a system flow from the ground up.
- Interact with internal/external users to gather requirements that are then used to produce business workflow.
- Identify and understand software/system limitations that are to-be integrated into the business workflows.

EXPERIENCE

SOFTWARE ENGINEER

@ Ever-Net Data (Metrobank Japan - *outsourced/consultant*) September 2017 – Present

<http://www.ever-net.co.jp/>

Tokyo, Japan

PROJECTS:

Designed, developed and Implemented:

- MUFG Bank Transaction SFTP Automation
- Email Marketing and Tracking Platform
- Exchange-Rate Portal
- Japan-Post status tracker Automation
- Record Management Ecosystem
- In-house SSO Authentication
- In-house Two Factor Authentication
